## JavaImport for Android 3.9 Full Source

```
lint().files(  
    manifest().minSdk( min: 24),  
    java(  
        to: "src/test/pkg/LogTest.java",  
        source: """  
            package test.pkg;  
  
            import ...  
  
            /ClassNameDiffersFromFileName/ public class LogTest2 {  
                public void checkLongTag(boolean shouldLog) {  
                    if (shouldLog) {  
                        // String literal tags  
                        Log.d("really_really_really_really_really_long_tag", "message"); // error: too long  
                    }  
                }  
            }""")  
    ).indented()  
).run().expectClean()
```
